MongoDB University delivers online courses in a private learning environment to address the needs of our Enterprise customers. This training provides a comprehensive introduction to using MongoDB for both developers and DBAs. The learning environment is engaging and interactive. It includes an extensive set of hands-on labs that provide students real experience using the product.

These classes are available on-demand. Students may begin a course at any time and complete the training at their own pace. Help is available from a MongoDB instructor through the class discussion forum and email. Students who successfully complete a course receive a certificate of completion from MongoDB University.

How It Works

- **Access**. MongoDB Enterprise subscribers should contact their account manager to request access. We provide instructions and a URL for accessing your private, on-demand environment.
- **Unlimited Seats**. With your MongoDB Enterprise subscription, any number of employees may access the training at any time.
- **Availability**. On-demand training is available while your subscription is active.
- **Security**. Access is restricted by license key and unique login. We require students to have a valid email address in your company's domain.

Courses

Active MongoDB Enterprise subscribers have access to the following courses:
- **M101P: MongoDB for Python Developers**
- **M101J: MongoDB for Java Developers**
- **M101JS: MongoDB for Node.js Developers (available October 1, 2013)**
- **M102: MongoDB for DBAs**

Course Outlines

Courses are organized as a series of chapters. Each chapter builds on the material in those before, and your admin users can easily view the progress of students as they advance through the course. For each chapter, students complete a series of short lessons. Most lessons are 3-8 minutes in length and conclude with a quiz to test their understanding. Students complete a set of hands on exercises at the end of each chapter. There are 7 chapters per course; each requires approximately 5 hours to complete.

- **Developer course chapters**: Overview of MongoDB; MongoDB Query Language; Schema Design; Performance; Aggregation; Sharding and Replication; Case Studies.

- **DBA course chapters**: JSON, BSON, and the Mongo Shell; Inserting and Updating, MongoDB Commands; Indexes and Optimizing Performance; Replication; Replica Set Configuration; Sharding; Security and Backup.

How to Buy

Private On-Demand Training is only available as part of the MongoDB Enterprise subscription. Contact your account manager for further details or email **education@mongodb.com**.
